

## Judicial Dialogue

*Martin Belov (ed.)*

Judicial dialogue is one of the pressing phenomena in contemporary EU law and constitutional law. It is a device of judicial policy-making and networking and an instrument for policy coordination and negotiation between the national, international and supranational legal orders. Judicial dialogue is also tipping point of the influence of courts on multilevel constitutional politics in the context of global constitutional (dis)order.

This book provides original analysis of the different aspects of judicial dialogue. It starts with exploring the constitutional dimension of this phenomenon. The volume offers insightful analysis in relation to the spheres of public finance management, putting emphasis on the judicial dialogue related to the Economic and Monetary Union and the Eurozone crisis management. It outlines important issues of judicial dialogue in Private International Law and international dispute settlement. The book finishes with enlightening case-studies of the judicial dialogue between the Court of Justice of the EU and several national courts. The book offers novel theoretical insights and comparative research combined with case-studies.
